

Burning Yak Dung

a culture and science clash in Tibet

ATLANTA SCIENCE FESTIVAL

Are scientists obligated to inform a population to change their culture if science tells them that the cultural practices of that population may be detrimental to their health and well being?

This event will showcase the indoor air quality research that Emory researchers are doing in Tibet, introduce Tibetan culture, and kindle public discussion about the societal impacts of science and the moral and ethical dilemmas that scientists encounter. As a special treat, the Tibetan community will provide momos (Tibetan dumplings) and tea during the event.

Wednesday, March 25, 2015

Emory University

Tent Demo

(yak dung burning, air quality measurements)

Cox Hall bridge

10am–5pm

Discussion Panel

Math and Science Center
Room E208

6–8pm
